Appendix C. PC Simulation Limitations

Running on-line or off-line simulation when designing an EasyBuilder Pro project can help users find out if the project will work as planned. However, some features only works on HMI, in which case the project should be downloaded to HMI in order to see the effects. Please take this into consideration when designing projects.

When running simulation on PC, the historical data is stored in their respective destination folder that is placed under EasyBuilder Pro installation directory:

- HMI_memory: when the designated destination is HMI memory.
- SD_card: when the designated destination is SD card.
- usb1: when the designated destination is USB Disk.
- usb2: when the designated destination is USB Disk2. (Applicable only for models that support two USB disks.)

Features that do not work when running on-line/off-line simulation on PC:

cMT/cMT X Series

- Enhanced Security Mode - Plugin
- Media Player
- Video In: USB Camera
- Video In: IP Camera
- Video In: Video Input (analog)
- PDF Reader
- VNC Viewer
- PLC Web Browser

eMT/iE/XE/mTV Series

- Video In: USB Camera
- Video In: IP Camera
- Video In: Video Input (analog)
- VNC Viewer
